AI AWARENESS - 60 QUESTIONS WITH ANSWERS

Questions + Short Answers + हिंदी-script Hinglish Explanation

Trainer Reference
Current-model questions verified for 27 Oct 2026.

Answers are kept to one word / one sentence where possible. Explanations use Hindi alphabets with English technical terms.

Section A - AI Companies & Latest Models

Q1. ChatGPT is developed by which company?

Answer: OpenAI.

Explanation: ChatGPT को OpenAI ने develop किया है। यह text, coding, analysis और multimodal tasks के लिए popular AI assistant है।

Q2. Claude is developed by which AI company?

Answer: Anthropic.

Explanation: Claude को Anthropic ने develop किया है। Anthropic AI safety और frontier AI models के लिए जाना जाता है।

Q3. Gemini is developed by which company?

Answer: Google / Google DeepMind.

Explanation: Gemini Google का AI model family है, जिसे Google DeepMind develop करता है।

Q4. Llama models are developed by which company?

Answer: Meta.

Explanation: Llama model family Meta द्वारा develop की जाती है और open-weight AI ecosystem में काफी famous है।

Q5. Grok is developed by which company?

Answer: xAI.

Explanation: Grok को xAI ने develop किया है। यह xAI का conversational AI model family है।

Q6. Mistral AI is headquartered in which country?

Answer: France.

Explanation: Mistral AI एक French AI company है और इसका headquarters Paris, France में है।

Q7. What is the name of OpenAI's flagship GPT-6 frontier model?

Answer: GPT-6 Astra.

Explanation: GPT-6 Astra OpenAI का flagship frontier model है, जिसे सबसे demanding reasoning और professional work के लिए position किया गया है।

Q8. Which OpenAI model is positioned as a lower-cost model with near-Astra intelligence for coding and professional work?

Answer: GPT-6.1 Sol.

Explanation: GPT-6.1 Sol को near-Astra intelligence के साथ coding, computer use और professional work के लिए lower-cost option के रूप में launch किया गया।

Q9. What is Anthropic's latest Haiku model called as of October 2026?

Answer: Claude Haiku 5.5.

Explanation: Claude Haiku 5.5 Anthropic का fast और cost-sensitive workloads के लिए optimized small model है।

Q10. What is Google's latest flagship Gemini model called as of October 2026?

Answer: Gemini 4 Argon.

Explanation: Gemini 4 Argon Google का latest flagship frontier model है, जिसे complex reasoning और real-world professional tasks के लिए बनाया गया है।

Section B - Generative AI & LLM Concepts

Q11. What does LLM stand for?

Answer: Large Language Model.

Explanation: LLM ऐसा AI model होता है जो बहुत बड़े text data पर train होकर language को understand और generate करता है।

Q12. What is Generative AI?

Answer: AI that creates new content.

Explanation: Generative AI नया text, image, audio, video या code generate कर सकता है, सिर्फ existing data classify नहीं करता।

Q13. What is a prompt in Generative AI?

Answer: Instruction or input given to an AI model.

Explanation: Prompt वह instruction या input है जो हम AI को देते हैं ताकि वह desired response generate करे।

Q14. What is a system prompt?

Answer: A high-priority instruction that guides model behavior.

Explanation: System prompt AI के behavior, rules और response style को higher priority पर control करता है।

Q15. What is an AI hallucination?

Answer: A confident but incorrect or unsupported AI response.

Explanation: जब AI गलत या unsupported information को सही confidence के साथ generate करता है, उसे hallucination कहते हैं।

Q16. What is a token in an LLM?

Answer: A unit of text processed by the model.

Explanation: LLM text को छोटे units यानी tokens में process करता है; token पूरा word, word का part या symbol हो सकता है।

Q17. What does context window mean?

Answer: The amount of information a model can consider at one time.

Explanation: Context window बताता है कि model एक interaction में कितने tokens या कितनी information को ध्यान में रख सकता है।

Q18. What is inference in AI?

Answer: Using a trained model to produce predictions or responses.

Explanation: Training के बाद जब model input पर answer या prediction generate करता है, उस process को inference कहते हैं।

Q19. What is fine-tuning?

Answer: Additional training of a model on specialized data.

Explanation: Fine-tuning में existing model को specific domain या task के data पर further train किया जाता है।

Q20. What does multimodal AI mean?

Answer: AI that can work with multiple data types.

Explanation: Multimodal AI text के साथ image, audio, video जैसे multiple input/output types को समझ या generate कर सकता है।

Section C - Agents, RAG & Modern AI Development

Q21. What is an AI agent?

Answer: An AI system that can plan and take actions toward a goal.

Explanation: AI agent सिर्फ answer नहीं देता; goal के अनुसार planning, tool use और multiple actions भी कर सकता है।

Q22. What is the main difference between a chatbot and an AI agent?

Answer: An agent can take actions; a chatbot mainly responds.

Explanation: Chatbot सामान्यतः conversation करता है, जबकि agent tools use करके tasks execute और workflow आगे बढ़ा सकता है।

Q23. What does RAG stand for?

Answer: Retrieval-Augmented Generation.

Explanation: RAG में AI पहले external data या documents से relevant information retrieve करता है और फिर उसी आधार पर answer generate करता है।

Q24. Why is RAG used with LLMs?

Answer: To ground answers in external or updated information.

Explanation: RAG model को company documents, database या updated sources से context देता है, जिससे answers ज्यादा grounded हो सकते हैं।

Q25. What is an embedding?

Answer: A numerical vector representation of data.

Explanation: Embedding text, image या other data को numerical vector में represent करता है ताकि semantic similarity compare की जा सके।

Q26. What is a vector database used for in AI applications?

Answer: To store and search embeddings by similarity.

Explanation: Vector database embeddings store करता है और similar meaning वाले records को fast retrieve करने में help करता है।

Q27. What does tool calling allow an AI model to do?

Answer: Call external functions, APIs, or tools.

Explanation: Tool calling से AI calculator, database, search, API या other software tools को invoke करके task complete कर सकता है।

Q28. What does MCP stand for in modern AI application development?

Answer: Model Context Protocol.

Explanation: MCP एक standard protocol है जो AI applications को tools और data sources से structured तरीके से connect करने में help करता है।

Q29. What is an API key used for?

Answer: Authentication and authorization for an API.

Explanation: API key service को identify करती है कि request किस application या account से आ रही है और access allowed है या नहीं।

Q30. What is meant by an agentic workflow?

Answer: A workflow where AI plans, uses tools, and completes multiple steps.

Explanation: Agentic workflow में AI एक goal को छोटे steps में divide करके tools use करता है और result तक independently progress करता है।

Section D - AI Image, Video, Audio & Famous Tools

Q31. Midjourney is mainly famous for generating what type of content?

Answer: AI-generated images.

Explanation: Midjourney text prompts से creative और stylized images generate करने के लिए famous है।

Q32. Sora is primarily associated with which type of AI generation?

Answer: AI video generation.

Explanation: Sora OpenAI का video-generation technology family है जो prompts से video content create करने से जुड़ा है।

Q33. What is the name of OpenAI's current image-generation model family?

Answer: GPT Image family.

Explanation: OpenAI का GPT Image family image generation और image editing tasks के लिए use होता है।

Q34. What does text-to-image mean?

Answer: Generating an image from a text prompt.

Explanation: Text-to-image system user के written description को visual image में convert करता है।

Q35. What does text-to-video mean?

Answer: Generating video from a text prompt.

Explanation: Text-to-video system prompt के आधार पर moving visual content या video sequence generate करता है।

Q36. What does TTS stand for?

Answer: Text-to-Speech.

Explanation: TTS written text को synthetic spoken audio या voice में convert करता है।

Q37. What does STT stand for?

Answer: Speech-to-Text.

Explanation: STT spoken audio को written text में convert करता है; इसे transcription में use किया जाता है।

Q38. What does OCR do?

Answer: Extracts text from images or scanned documents.

Explanation: OCR image, photo या scanned PDF में मौजूद printed/handwritten text को machine-readable text में convert करता है।

Q39. What is a vision-language model?

Answer: A model that understands both visual and language information.

Explanation: Vision-language model image को देखकर उसके बारे में text-based reasoning, description या Q&A कर सकता है।

Q40. What is voice cloning in AI?

Answer: Creating a synthetic voice that imitates a person's voice.

Explanation: Voice cloning AI किसी व्यक्ति की voice characteristics को learn करके similar synthetic speech generate कर सकता है।

Section E - Coding AI, Hardware & Practical Awareness

Q41. GitHub Copilot is mainly used for what purpose?

Answer: AI-assisted software development.

Explanation: GitHub Copilot code suggestions, explanations, debugging और development workflow में programmers की help करता है।

Q42. Cursor is mainly used for what type of work?

Answer: AI-assisted coding and software development.

Explanation: Cursor एक AI-focused code editor है जो code generation, editing, refactoring और codebase understanding में help करता है।

Q43. What is an AI coding assistant?

Answer: An AI tool that helps write, understand, test, or debug code.

Explanation: AI coding assistant developer को code लिखने, bugs समझने, tests बनाने और documentation में help करता है।

Q44. What hardware component is most commonly used to train large AI models?

Answer: GPU.

Explanation: Large AI models की training में GPUs बहुत use होते हैं क्योंकि वे parallel numerical calculations fast कर सकते हैं।

Q45. What does GPU stand for?

Answer: Graphics Processing Unit.

Explanation: GPU originally graphics processing के लिए बना था, लेकिन AI workloads में parallel computation के कारण बहुत important है।

Q46. What does NPU stand for?

Answer: Neural Processing Unit.

Explanation: NPU AI और neural-network computations को efficiently run करने के लिए specialized processor होता है।

Q47. What is VRAM mainly used for during AI workloads?

Answer: Storing model data and tensors on the GPU.

Explanation: VRAM GPU की high-speed memory है जिसमें model weights, activations और tensors जैसे data रखे जाते हैं।

Q48. What does running an AI model locally mean?

Answer: Running the model on your own device instead of a remote cloud server.

Explanation: Local model आपके computer/device पर execute होता है, इसलिए data processing cloud पर भेजना जरूरी नहीं होता।

Q49. What is an open-weight AI model?

Answer: A model whose trained weights are publicly available under a license.

Explanation: Open-weight model के weights users download और run कर सकते हैं, लेकिन license conditions फिर भी apply हो सकती हैं।

Q50. What is model distillation?

Answer: Training a smaller model to imitate a larger model.

Explanation: Distillation में powerful teacher model की knowledge को smaller student model में transfer करने की कोशिश की जाती है।

Section F - Latest AI Awareness & 2026 News

Q51. Which OpenAI model family includes Astra, Sol and Luna?

Answer: GPT-6 family.

Explanation: Astra, Sol और Luna OpenAI के GPT-6 model family के अलग capability/cost tiers हैं।

Q52. Which OpenAI GPT-6 model is designed for the most demanding frontier work?

Answer: GPT-6 Astra.

Explanation: GPT-6 Astra को OpenAI ने सबसे demanding frontier reasoning और professional work के लिए position किया है।

Q53. Which Claude 5.5 model is positioned for complex agentic coding and knowledge work?

Answer: Claude Opus 5.5.

Explanation: Claude Opus 5.5 complex agentic coding, judgment-heavy tasks और knowledge work के लिए Anthropic का top 5.5 model है।

Q54. Which Claude 5.5 model is designed for fast, high-volume and cost-sensitive work?

Answer: Claude Haiku 5.5.

Explanation: Haiku 5.5 speed और lower cost के लिए optimized है, इसलिए high-volume tasks में useful है।

Q55. What is Google's Gemini 4 flagship model called?

Answer: Gemini 4 Argon.

Explanation: Gemini 4 Argon Google का frontier flagship model है जो complex coding, finance, legal और science tasks पर focus करता है।

Q56. What is the name of OpenAI's current model family for advanced image generation and editing?

Answer: GPT Image family.

Explanation: GPT Image family advanced image generation और editing workflows के लिए OpenAI का image model line है।

Q57. What is the name of OpenAI's current realtime voice model family?

Answer: GPT-Live family (for example, GPT-Live-1).

Explanation: GPT-Live models realtime, full-duplex voice conversations के लिए designed हैं, जहाँ user और AI naturally बोल सकते हैं।

Q58. Which company develops the Claude Opus, Sonnet and Haiku model families?

Answer: Anthropic.

Explanation: Opus, Sonnet और Haiku Claude model tiers हैं और इन्हें Anthropic develop करता है।

Q59. What AI safety risk occurs when malicious instructions are hidden inside external content and try to control the model?

Answer: Prompt injection.

Explanation: Prompt injection में malicious content AI को original instructions ignore करके attacker की instructions follow करवाने की कोशिश करता है।

Q60. Why should important medical, legal, financial or business information generated by AI be verified by a human?

Answer: Because AI can be wrong, outdated, or incomplete.

Explanation: High-stakes decisions में AI output में hallucination, outdated context या missing details हो सकते हैं, इसलिए qualified human verification जरूरी है।
